PROFESSIONAL SUMMARY

Junior data analyst and Navy veteran with 5 years of experience tracking, validating, and analyzing inventory and maintenance data. Skilled in SQL, Excel, Tableau, and R with project experience in healthcare operations and sales performance.

SKILLS

Data Analysis / Reporting: SQL (joins, aggregates, CTEs, Window functions), Excel (VLOOKUP, XLOOKUP, data cleaning, pivot tables, dashboards), R, Python
Data Visualization: Tableau (dashboards, filters, parameters, KPI Tracking), QGIS

PROFESSIONAL EXPERIENCE

Aviation Ordnanceman, United States Navy | USS Abraham Lincoln (CVN-72) **January 2016 – January 2021**

- Rebuilt tracking and calibration processes, correcting data discrepancies to improve accuracy and increase operational readiness from 40% to 100%.
- Validated and reconciled records for $1.7M in conventional munitions during a 2,000-ton transfer, verifying data against physical assets and delivering zero discrepancies.
- Evaluated usage, condition, and failure trends across 10,000+ assets to flag issues, reduce downtime, and sustain operational availability.
- Analyzed maintenance logs and performance testing data for air-launched missiles to detect anomalies and equipment trends, mitigate failure risk, and maintain safety compliance.
- Leveraged asset data to identify inventory gaps and inform logistics decisions supporting 70 aircraft.

DATA ANALYTICS PROJECTS

Citi Bike NYC Trip Analysis (SQL) **Completed December 2025**

- Analyzed 2.12M trips to identify 5 PM as the peak demand hour (185,704 trips), signaling periods of highest demand and potential bike shortages.
- Discovered casual users made 3x more round trips than subscribed users, revealing distinct segments to target for growth.
- Detected 13 of 2,100 stations with 200+ more bikes leaving than arriving, delivering rebalancing recommendations to address distribution gaps.

Bike Sales Analysis (Excel) **Completed April 2026**

- Built an interactive Excel dashboard analyzing $84.8M in bike sales revenue across 6 countries, highlighting profit variance by product category and geography.
- Identified a $1.07M profit decline in the Bikes category year over year, flagging it as the primary driver of an overall $495K profit decrease.
- Tracked operating profit margin trends across quarters, revealing an 18-point swing from a 33% low to a 51% margin peak.

Emergency Department Patient Flow Analysis (Tableau) **Completed January 2026**

- Analyzed emergency department workflow data across 9,216 patient encounters to identify an average wait time of 35 minutes, recommending process changes to improve patient flow.
- Isolated patient age and department as stronger predictors of satisfaction than wait times, with patients 66+ and Orthopedics referrals scoring lowest.
- Flagged two specialties accounting for 74% of referral volume, informing capacity planning and resource allocation decisions.

EDUCATION & CERTIFICATIONS

University of North Carolina at Chapel Hill | Chapel Hill, NC **May 2025**
B.A. in Global Studies (Health & Environment), Minor in Data Science

Relevant Coursework: Foundations of Statistics and Data Science, Introduction to Data Models and Inference, Data Structures, Algorithms & Analysis, Intro to Urban Data Analytics

Google Data Analytics Professional Certificate **April 2026**
